Professional Summary

Aspiring **Cybersecurity Professional** currently pursuing a Bachelor's degree in **Digital Forensics and Cyber Security** (4th Semester), alongside ongoing **Certified Ethical Hacker (CEH)** course work. Eager to apply theoretical knowledge in ethical hacking, system security, and threat analysis within a professional environment. Seeking an opportunity to contribute to organizational security while gaining practical industry experience.

Education

Hamdard University KDA Campus, Karachi

Bachelor of Science (BS) in Digital Forensics and Cyber Security

Key Focus Areas: Network Security, Cybercrime Investigation, Ethical Hacking, Incident Response
November 2024 – November 2028 (present)

Government Degree Science and Commerce College, Block-7, Gulshan-e-Iqbal, Karachi

Intermediate in Pre-Engineering

October 2021 – July 2023

Ghazi Foundation School, Karachi

Matriculation in Computer Science

June 2021

Experience

Cyberster — Red Team Intern

June 2026 – Present | Remote

- Performing hands-on security assessments and identifying vulnerabilities in simulated environments.
- Developing practical skills in penetration testing, reconnaissance, and offensive security methodologies.
- Learning and applying Red Team techniques to assess and improve organizational security.
- Conducting vulnerability analysis, attack simulations, and security testing in controlled environments.

Secure Dev Lab — Ethical Hacker Intern

April 2026 – May 2026 | Remote

- Gained practical exposure to vulnerability assessment and security concepts.
- Learned basic penetration testing techniques and cybersecurity best practices.
- Learned the fundamentals of Ethical Hacking and Cybersecurity practices.
- Performed basic Vulnerability Assessment and Security Testing tasks.

Management & Volunteer | Hamdard University – Sports Week (2024 – 2025)

- Planned and executed sports week operations
- Executed complex operations and resolved on-ground coordination issues under pressure.

Envision International — Sales Executive

May 2024 – May 2025 | Karachi Division, Sindh, Pakistan

- Managed sensitive client data with high attention to accuracy and confidentiality.
- Communicated complex solutions effectively to clients, a skill directly transferable to explaining security findings to stakeholders.

Technical Skills

- **Cybersecurity:** Vulnerability Assessment, Ethical Hacking, Reverse Engineering, IDS, Threat Analysis
- **Tools and Technologies:** Wireshark, Kali Linux, VirtualBox
- **Programming:** C++, C#, Python, OOP, Data Structures & Algorithms
- **Learning Platforms:** TryHackMe (In Progress), Hack The Box (Exploring)
- **Networking Basics:** IP addressing, Protocols, Network analysis, OSI Model.
- **Operating Systems:** Windows, Linux, Ubuntu
- **Soft Skills:** Presentation Skills, Problem-Solving, Communication

Certifications

- Introduction to Cyber Security
- **CCEP** (Certified Cybersecurity Educator Professional)
- **CLLMSP** (Certified LLM Security Professional)
- **COFPS** (Certified Online Fraud Prevention Specialist)
- **BTJA** (Blue Team Junior Analyst Pathway)
- **CEH** (Certified Ethical Hacking) (**Ongoing**)
- TryHackMe Training

Projects

- **STRYKER-7 Tactical Suite — Autonomous VAPT Engine:** Built an AI-powered cybersecurity framework integrating 7 VAPT tools with an automated execution system. It generates real-time, human-readable vulnerability insights along with threat context and mitigation guidance. The system helps security teams quickly understand and respond to risks.
- **SafeEd - Secure Record System:** Developed a secure, console-based student record system using Python. Implemented SHA-256 hashing for credential protection, Role-Based Access Control (RBAC), and automated security activity logging.
- **Android Security Assessment:** Performed a vulnerability assessment on an Android application to identify and document potential attack vectors. Focus included threat analysis and security testing methodology
